Wordpress Postman Selenium

PROJECTS

TimeSheet Management System (05/2024 - Present)

- This is and Node Js and React Js based project and used Mysql for Database. This is for manage out time sheet of work, how many hours have you spent on work.
- Also created an admin-side portal through which we can grant access to users, clients, and teams.
- We can also check all client reports along with their associated tasks and users and tickets.
- We can also retrieve user-specific timesheet information, including the time spent by each user on different clients, tickets, and tasks.
- Integrated with HubSpot CRM, allowing visibility into actual and projected bills for all years and months, with team leaders able to fill in the data.
- Created a scheduler to send reminder emails to employees and admins for those who didn't fill out the timesheet for the previous day.
- It is currently in use in my office and offers a wide range of features like Billing, Projections etc.

Hubspot Public apps (04/2023 - 04/2024)

- Normalization or Regularizer and UID Creation (to regularize data and provide unique id for every lead in hubspot.
